Questions for Community Feedback

This building is planned to house band council, band administration, cultural heritage and other important services. It will also include community and public-oriented spaces such as a gymnasium, youth room, weight room, Elders room, artifacts display room, classroom, and kitchen. We are excited to hear your feedback on the building design, the types of spaces and how they will be used and designed to best suit the needs and wishes of our community. Four design concepts will be presented as a tool for discussion and for ideas to be shared and generated.

1. What comes to mind when you imagine a Community Building that is unique to Upper Nicola?
2. Is it important for the public-oriented spaces to have a direct connection to the outdoors? Example: weight room or gym expands or opens to outside
3. Would a large, flexible outdoor space be useful to the community? If yes, would you prefer it to be sheltered and protected like a large courtyard, or have it outward-looking to views of the landscape?
4. Does any aspect of sustainability excite you when thinking about this new Community Building? Example: a small building footprint, solar power, water collection and re-use, natural and local building materials, green roofs)
